Commercial Licence (draft)

Document OHM-DC-2000-DOC-02. Revision A6, Issue P2. Generated 2026-11-08 20:00 UTC.

DRAFT LICENCE. PREPARED WITHOUT LEGAL REVIEW. NOT CLAIMED TO BE LEGALLY ENFORCEABLE IN ANY JURISDICTION. A QUALIFIED LEGAL PROFESSIONAL MUST REVIEW AND ADAPT THIS TEXT BEFORE IT IS USED WITH ANY CUSTOMER.

Notice about this draft

DRAFT LICENCE. PREPARED WITHOUT LEGAL REVIEW. NOT CLAIMED TO BE LEGALLY ENFORCEABLE IN ANY JURISDICTION. A QUALIFIED LEGAL PROFESSIONAL MUST REVIEW AND ADAPT THIS TEXT BEFORE IT IS USED WITH ANY CUSTOMER.

This text is a starting point for the owner and a legal professional. Items in [square brackets] are to be completed. Nothing in it is a statement that any clause is valid or enforceable where you operate.

1. Parties and product

Licensor: Ohmetry (ohmetry.com) [legal entity, registered address and jurisdiction to be confirmed by the owner and the legal professional]. Licensee: the individual or organisation named on the order. Product: the OHMETRY 2 MW DATA CENTRE ELECTRICAL ENGINEERING PROJECT (OHM-DC-2000) package, revision A6, in the tier stated on the order.

2. Definitions

- Package: all files supplied, including workbooks, documents, specification templates, drawings, reports, training materials, registers and, where the tier includes it, the calculation engine and configuration.
- Authorised User: a named individual who may use the Package under the tier purchased.
- Organisation: a company or other entity that holds a Corporate licence.
- Project Deliverable: a document, calculation, drawing or specification the Licensee creates for its own or a client's project using the Package.
- Derived Work: a modification of, or work substantially based on, the Package other than a Project Deliverable.

3. Licence tiers

Tier	Includes	Users
Starter	Selected calculation workbooks, sample design basis	One individual, personal use
Professional	Complete package: twenty workbooks, reports, drawings, specification templates	One named individual, personal or single-user professional use
Professional + Learning	Professional package plus the twelve training modules, exercises, assessments and the certificate template	One named individual
Corporate	As agreed in writing: multi-user or organisation-wide terms, quote-based pricing, defined redistribution and support rights	Named Organisation and the users stated in the order

Fees, payment terms and any support or update entitlements for each tier are in the order or the commercial proposal: [to be completed].

4. Grant

Subject to this licence and payment of the fees, Ohmetry grants the Licensee a non-exclusive, non-transferable, non-sublicensable licence to use the Package, for the version and tier purchased, for the term in section 14. The Package is licensed, not sold. All rights not granted are reserved.

5. Permitted use

- Individual engineers (Starter, Professional, Professional + Learning): use by the named individual for their own learning and for their own professional work, including work for clients, by incorporating results into Project Deliverables.
- Consulting companies: use by each named Authorised User under a Professional licence per user, or by the users named under a Corporate licence. A Professional licence is not shared between people.
- Printing or copying the Package for the Licensee's own backup and for the Authorised User's own reference.
- Use of the calculation outputs and the Licensee's own data in Project Deliverables, provided the status labels and limitations are not removed or misrepresented (section 8).

6. Restrictions

- No redistribution: do not copy, share, upload, publish, lend or otherwise make the Package or any part of it available to anyone who is not an Authorised User, including by file-sharing, public repositories, forums, template marketplaces or client handover of the Package itself.
- No resale or sublicence: do not sell, rent, lease, sublicense or offer the Package, or a Derived Work, or a product substantially similar to it, to others.
- No use of the Package to build or train a competing product or service sold to third parties.
- No removal or alteration of copyright, licence, status or disclaimer notices.
- No use of the Ohmetry name or marks to suggest endorsement of the Licensee's work.
- Training materials may be used to train the Licensee only, unless a Corporate licence states otherwise.

Client handover: a Project Deliverable may be given to the client. The Package, its workbooks and templates in their original form may not be.

[Confirm with legal advice whether and how these restrictions are enforceable where the Licensee is located.]

7. Modification

The Licensee may modify the workbooks, templates and configuration for its own internal use. Modifications are made at the Licensee's own risk, are Derived Works and remain subject to this licence, and may not be distributed. Ohmetry gives no support or warranty for modified files. The Licensee must not modify the Package so that unverified or uncalculated results appear verified or passing.

8. Engineering responsibility and status labels

The Package is a preliminary educational and reference tool. It is not engineering advice, a design, a certification or a statement of compliance with any code or standard. The Licensee, and the engineer who signs any resulting work, remains solely responsible for the correctness, suitability and verification of any Project Deliverable. The Licensee shall not present results as verified unless the inputs and results have been verified by a suitably qualified person. The status labels (NOT VERIFIED, PRELIMINARY and the like) shall not be removed from material shown to others.

9. Outputs and Licensee data

The Licensee owns its own data and the Project Deliverables it creates, subject to Ohmetry's rights in the underlying Package. Ohmetry does not claim ownership of the Licensee's project data and does not receive it. Manufacturer datasheets and standards remain the property of their owners; the Licensee must hold lawful copies of any standard it relies on.

10. Third-party materials

The Package names standards, manufacturers and software but does not reproduce standards text. Open-source components used by the engine (for example pydantic, PyYAML, openpyxl, reportlab) remain under their own licences, which apply to those components.

11. Updates and support

Updates and support are provided only as stated in the order for the tier: support channel: email hello@ohmetry.com; [update period and response expectations to be completed]. Ohmetry may release corrections. No update obligation exists beyond the stated entitlement.

12. Warranty disclaimer

To the maximum extent permitted by law, the Package is provided "as is" without warranties of any kind, express or implied, including merchantability, fitness for a particular purpose, accuracy, completeness and non-infringement. Ohmetry does not warrant that the Package is free of errors or that its results are correct for any project. [Legal review: confirm wording for the Licensee's jurisdiction.]

13. Limitation of liability

To the maximum extent permitted by law: (a) Ohmetry is not liable for any indirect, incidental, special, consequential or punitive loss, loss of profit, loss of data, project delay, rework, equipment damage or injury arising from use of, or reliance on, the Package or its results; (b) Ohmetry's total liability arising from this licence is limited to the fees paid for the Package in the twelve months before the claim; (c) nothing excludes or limits liability that cannot lawfully be excluded or limited. [Legal review required: these limits may not be enforceable in every jurisdiction.]

14. Term and termination

The licence lasts for the version purchased until terminated. It terminates automatically if the Licensee breaches sections 5 to 8, and Ohmetry may terminate for other material breach after notice. On termination the Licensee shall stop using the Package and delete or destroy all copies, except Project Deliverables already created. Sections 9, 12, 13 and 16 survive termination.

15. Transfer and assignment

The licence may not be transferred or assigned without Ohmetry's written consent. A Corporate licence may be assigned only as stated in its terms: [to be completed].

16. Governing law and disputes

[Governing law, venue and dispute process to be determined with legal advice.]

17. General

[Entire agreement, severability, notices and amendment terms to be completed by the legal professional.] Contact for licence matters: hello@ohmetry.com.
